СИСТЕМА СЕРТИФИКАЦИИ РУССКОГО РЕГИСТРА
RUSSIAN REGISTER CERTIFICATION SYSTEM

CERTIFICATE

This is to certify that the Quality Management System of
NPP Technology Company, Ltd.
Vodrem 46, 25, Chelyabinsk, Russia, 454901

has been assessed and found to be in accordance
with the requirements of
ISO 9001:2015

in respect of development, engineering, production and sales of modifiers
(refining, spheroidizing, inoculating and alloying ones) and cored wire
for extra-furnace cast iron and steel processing

No: 20.1982.026
of 21st December, 2020

This certificate is valid until 21st December, 2023

The certificate covers only those sites of the company which are named in this certificate. This certificate becomes invalid if conditions of certification are not fulfilled (http://www.russianregister.ru/index.htm (80-107-940)).

CERTIFICATE OF CONFORMITY
With EU MD 98/37/EC As Amended By 98/79/EC
LVD 73/23/EEC As Amended By 93/68/EEC

Reference No.: STS20060011
Certificate Holder: Wuxi City Nanjiang Package Machinery Plant
Address: Baohi Industry Park, Wuxi City, Jiangsu Province, P.R.China
Product Name: High-speed Paper Hands Making Machine
Model No: WFD-100
Applicable Standard: EN ISO 12100-1; EN ISO 12100-2; EN ISO 15090; EN 60204-1
Test Report Number: NJ-061011
Date Of Issuance: Nov 15, 2006

Conclusion of Assessment:
We hereby confirm that the technical construction file and manufacturing, inspection and testing processes for above mentioned equipment comply with the essential safety requirements of EU Machinery Directive 98/37/EC as amended by 98/79/EC and Low Voltage Directive 73/23/EEC as amended by 93/68/EEC Applied Codes and Standards.

Note: This Certificate is Only Valid For The Equipment And Configuration Described, And In Conjunction With The Test Data Detailed Above.

Authorized Signatory:
James Smith
Name: James Smith
Position: Operations Manager

CE

Certificate of Conformance (CoC) OC 001 Part 1.1 (Last Revised 02/12)

Supplier Name: _____
Supplier Number: _____
Part Description: _____
Part Number: _____
Drawing Number: _____ Revision: _____
Purchase Order # _____
Quantity: _____ (if applicable)
Serial Number(s): _____ (if applicable)
Lot/Batch Number: _____

All technical requirements of the contract are satisfied. Quality and performance are in accordance with the contract, the specifications, and all references and associated contractual drawings and documents.

I, as a supplier to Oshikon Systems, acknowledge and certify the material covered under this document is produced in accordance with the following:

All contractual 'Buy Order' requirements.
 Register Standards Code
 Oshikon Quality Manual
 Product Conformance
 Free of Contaminated Material (Acknowledge by marking the boxes)

Signature: _____ Title: _____ Computer Date: _____

This certifies the parts/materials identified above conform to all applicable drawings and/or specifications as evidenced by results or other documentation on file and all other purchase order and quality requirements have been met.

Certificate of Conformity

[COMPANY NAME]

Address: City STATE ZIP,
[Email] [Contact] [Website]

It is to certify that the below-mentioned product has been thoroughly checked by our organization against the standards set in our updated manuals and catalogs. All the raw materials used in its production were free from any toxic or environmentally harmful chemicals. The direct processes involved in the production and indirect processes of the overall business practices have been tested, checked, verified and approved by our Quality Assurance Department and Compliance Department.

The product met the quality standards and the required specifications. This included the raw materials, involved processes, and performance of the product. The packaging of the product also met the quality standards and contained a minimal and unavoidable quantity of chemicals. The packaging is recyclable and environment friendly. The total concentration level of harmful chemicals is limited to XXX parts per million by weight.

No animal testing was involved in the development of the product. No child labor is employed. Safety conditions and precautions in the production facility are satisfactory. The product meets the ethical standards set by us.

No breach of law, rules or regulations has been found. The organizational practices, raw materials, product, processes, and packaging have been verified and approved.

Company Name _____

Company Address _____

Product Details:

Name/Item/ID	Description	Average Quantity produced per month

Certifying Authority _____

Certified by: _____

Representative Name	Signature

Date _____

This certificate of conformity is valid for five years only, provided there are no major changes in the top management, raw materials, processes or employed production machinery/technology.

For beginners who don't know what to buy & sell, have 0 experience about importing from China, you can get all questions answered in this tutorial.(10 video

A Certificate of Performance”, “Certificate of Conformity”, or “CoC” is a document issued by authority to assure customers or buyers that the product is compliant with the respective target market’s regulatory standards. As each country has its own regulation on imported products, such as compliance with certain standards, importers need to consider both national and international standards for the destination country. What can you learn about the certificate of conformance in this article? At the end of this blog post, you will be able to: Grasp a better understanding of the Certificate of Conformance and its purpose, as well as the importanceUnderstand who provides the Certificate of ConformityUnderstand what makes up the Certificate of ConformityLearn the difference between a Certificate of Conformity and a Certificate of Analysis Before we begin, we would also like to share more about Standard and what we specialise in. About Standard We are a regulatory consultancy and technology company that helps businesses implement international standards, streamline business processes across the organisation, and accelerate global growth. We have supported more than 400 companies and enabled companies like yours to accelerate and automate most of the work needed to successfully implement management systems according to internationally recognised standards. If you would like to find out more, contact us here. Certificate Of Conformance A document that may be considered one of the most important factors in establishing a relationship with trust between a manufacturer and its customer is a Certificate of Conformance (CoC). CoC demonstrates product compliance to the minimum production, technical and/or safety standards. These standards vary depending on the product and where it will be marketed, as different industries and countries impose different regulatory requirements. It is required to state and declare that a product and company’s manufacturing processes meet all the product requirements depending on the product type. What is the purpose of a certificate of conformance? A product will require conformance to the various regulatory requirements or customs clearance if you intend to market it in various markets. This document facilitates trading by promoting consumer confidence within industries and markets. Certain countries might request a CoC depending on the categories of imported products for regulatory or custom regulation purposes. For example, your customers or buyer may require a CoC for products you manufactured as you sell them to various markets (e.g. United States, China or European countries). Often, you may face a problem placing your product into the market without a certificate of conformance. The ability to issue a CoC leads to the capability of placing your product on the market on time. Delays in obtaining approval for your product also may extend the time required and/or even prevent your product from being sold, affecting your profitability. On the other hand, having a certificate of conformance will speed up your inspection process by establishing applicable standards to improve process efficiency. Who provides a certificate of conformance? An authorised party or personnel issues a CoC to state that your product meets the requirements of certain standards or specifications. The authorised party or personnel may be the manufacturer itself or an independent appointed laboratory that conducts and provides tests results and certificates to prove compliance. What is required on a certificate of conformance? CoC is issued to legally state that your product has been manufactured and is in conformance with respect to the requirements from certain standards or specifications specified in the market’s regulation. It may also be specified in a certain contract with a buyer or company, including specifications, drawings, preservation, packaging, labelling requirement, and physical identification legally signed by those responsible for the statement. What details are included in the certificate of conformance? Generally, mandatory elements that should be listed in the CoC minimally are: Product Identification with the product description covered in the CoC and specification to the associated purchase order numbers.Manufacturer/ importer’s identification such as the legal name, address and contact number.List of all safety regulations/standards that the product must pass.List of certificates awarded to manufacturer that the product has been tested and is compliant.The date and place where the product was manufactured.Date and place when the product was tested for compliance with the product safety rules cited.Identification of any 3rd party laboratory/certification agency with an indication of who did the test or issued the certificates. What is the difference between a CoA and CoC? 1. CONTENT A CoC does not usually include particular test conditions, test specifications, parameters, and test details in terms of the content. On the other hand, a Certificate of Analysis (CoA) has more stringent and specific content than a CoC. CoA records the actual test measurement based on the design or manufacturing specifications of the products. It also specifies details such as the lot/batch number for traceability purposes. 2. ISSUER AND AUTHORITY A CoA is usually issued by the Quality Assurance/ Quality Control personnel with authority from the manufacturer to indicate and authenticate that your products being sold (specified identification of lot/ batch number) fulfil its product requirements the accompanying test results detailed. The test itself may be conducted in-house by the manufacturer or conducted by a testing agency on samples of your products against the specification given. A CoC may be issued by any authorised personnel/party, including third-party laboratories or certification agencies, to declare that your products comply with certain testing standards. Conclusion The Certificate of Conformance is one of the important documents to be issued by your company with the commitment to provide the product according to applicable regulatory standards. If you have any questions regarding the CoC or finding a recommended certification agency, please feel free to drop us an inquiry. At Standard, we believe that quality is everyone’s business because it takes a team to consistently deliver and uphold great standards that build confidence with customers, partners, and the community. We are a competent group of experts who can provide consultancy support and advice on using technological platforms for your company through this journey. A CE Certificate of Conformity (CoC) essentially states that a certain product is compliant with one or more regulations, directives or standards. It also includes information about the conformity assessment performed, the issuing company, product information, and supplier. In theory, this certificate is issued based on the issuing company reviewing or creating certain documents. This includes test reports and technical files. However, as I will explain in this guide, far from all documents titled ‘Certificate of Conformity’ are valid and based on an actual conformity assessment. In short, many of these documents are invalid and can result in your products being subject to a recall, fines, or other penalties. We Help Brands & Importers With Product Compliance (US & EU) Book a free consultation call today with Ivan Malloci to learn how we can help you with: Product Requirements Lists Product Certification Product & Packaging Labeling Lab Testing BOOK A FREE CONSULTATION What is a CE Certificate of Conformity? A CE Certificate of Conformity is a third-party issued document stating that a certain product is compliant with one or more directives, regulations, and harmonized standards. In general, it also states that the issuing company has tested or reviewed the complementary technical documentation – which is the basis for them issuing the Certificate of Conformity. What is the purpose of this document? CE Certificate of Conformity serves as a confirmation that your products and their documentation is compliant. At least that’s what it’s supposed to mean. That being said, a CE Certificate of Conformity is not a replacement for a Declaration of Conformity (DoC), technical file, and valid lab test report. That said, it is not necessarily mandatory to obtain a third-party issues Certificate of Conformity. But, it is valuable to have a qualified partner manage to test and review the documentation. That way you can feel more confident that it’s been done correctly. CE Certificate of Conformity Summary This information is often included in a Certificate of Conformity: Registration/Report Number: The report or certificate number can be used to verify if the document is valid. All certificates have some sort of registration or report number. Issuing Company: The company that issued the Certificate of Conformity, including their contact details, and address. Certificate Holder: The company for which the certificate was issued. This is usually the importer or manufacturer which intends to sell the product. Product Information: Product name, SKU, or model number. One certificate can sometimes cover more than one product. Regulations/Directives/Standards: Summary of the regulations, directives, and standards to which the product is certified to confirm. Here are some examples: EN 71-1 EN 71-2 EN 50581 EN 50065 EN 13637 Statement: Explains the basis for issuing the company. This is one example from a certificate issued by TÜV Rheinland: This certificate of conformity is based on the evolution of a sample of the above-mentioned product. Technical report and documentation are at the License Holder’s disposal. This is to certify that the tested sample is in conformity with all provisions of Annex I of Council Directive 2004/108/EC. This certificate does not imply an assessment of the production of the product and does not permit the use of a TÜV Rheinland mark of conformity. The holder of the certificate is authorized to use this certificate in connection with the EC declaration of conformity according to a.m. Directive. In short, the certificate of conformity is at the core an evaluation of the sample and its complementary documentation. This can, in turn, be used to support the DoC. Signature: The certificate is usually signed, stamped, or both. Certificates of Conformity Sample Fake Certificates of Conformity A certificate of conformity is in principle a good concept. However, there are many companies out there (does not include TÜV Rheinland) that issue these certificates without any lab testing and document review taking place. In short, some companies sell these certificates for products that lack test reports, technical documentation, and a Declaration of Conformity. The certificate is therefore issued based on nothing – but is still accepted by manufacturers and importers that don’t know better. As mentioned, a certificate of conformity is not a substitute or replacement for the following: We have conducted hundreds of supplier screenings in Asia, and elsewhere, in the last decade. This procedure involves that we request and verifying compliance documents held by the supplier. We frequently receive certificates of conformity without any complementary lab test report or other support documents. Personally, I think most non-EU suppliers simply don’t understand what the CE marking process means in practice. Some may genuinely believe that it’s only a matter of paying a fee for the sake of obtaining a certificate. Fake certificates were also reported by the European Safety Federation in 2020 and 2021. I recommend that you read this article on fake certificates concerning medical devices and PPE. *Issued by a notified body Other Certificate Titles We have also encountered identical product certificates with the following titles: CE Certificate Attestation of Conformity Certificate of Compliance How do I know if a CE Certificate of Conformity is valid? TÜV Rheinland, and other companies of good repute, generally offer databases where you can search and verify certificates and other documents. For example, the screenshot below is taken from the TÜV Rheinland test certificate database. How can I check if a CE Certificate of Conformity is fake? You can either search the certificate number in a database or email the issuing company. You can also contact the issuing company by email. You can assume that the document is invalid if the issuing company cannot provide any method of verification. That being said, the verification itself doesn’t prove that the certificate itself was issued based on an actual conformity assessment. You should therefore ask the issuing company and your supplier to provide supporting documents. Chances are that they don’t have any. Which products require a CE Certificate of Conformity? In theory, a CE Certificate of Conformity could be issued for any product which requires CE marking. Here are a few examples: Consumer electronics Electrical equipment Machinery Toys Children’s products with play features Sunglasses Other personal protective equipment Medical devices How do I obtain a CE Certificate of Conformity? You can obtain a certificate of conformity from a third-party, such as TÜV Rheinland. That said, you’re more likely to receive a certificate of conformity from your supplier. As mentioned, many of these documents are invalid and do not serve as any proof of compliance. Why do some suppliers provide invalid or fake certificates? Most likely because inexperienced importers keep falling for it. These certificates often look legit and official – and for some buyers, that’s enough to assume that the certificate they’ve received is all they need to ensure compliance. I think it ultimately comes down to wishful thinking. Spending time and money on lab testing, certification, user manuals, and labeling is painful. From their perspective, it sure would be great if a certificate of conformity could serve as a substitute or replacement for an expensive and time-consuming compliance process. That said, there are no shortcuts, and it doesn’t matter how official a certificate may seem if it’s not based on testing and a review of the actual technical documentation. What kind of risks do I face if we’re selling products based on an invalid CoC? Products that are ‘certified’ based on nothing at all (other than payment) are potential safety hazards. Importing products without prior safety testing and the mandatory documentation (e.g. DoC and technical files) can result in recalls and fines. Further, I know for a fact that market surveillance authorities in some EU countries have categorically rejected certificate of conformity documents as acceptable substitutes for a proper DoC, test report, and technical file. Importing products based on a CoC alone will therefore put both consumers and your business at risk. What is the difference between a Certificate of Conformity and a DoC? A Declaration of Conformity (DoC) is a document issued by the importer or manufacturer ‘placing the product on the market’. Issuing a DoC is mandatory when manufacturing or importing products that require CE marking. A Certificate of Conformity on the other hand is issued by a third party.
